

Altenmarkt, September 2008

## **PRESS RELEASE**

### **Marketing and Sales Information**

In September 2008, Alzmetall Werkzeugmaschinenfabrik und Gießerei Friedrich GmbH & Co. KG at Altenmarkt/Alz, Germany, has taken over the machine tools business (new machines business) from the company Donau-Werkzeugmaschinen GmbH & Co. KG. This takeover has been structured as an Asset Deal.

Since then, Design, Development, Sales, Assembly, Service and Marketing activities are emanating from the Alzmetall subsidiary "**Donau Werkzeugmaschinen GmbH**", at Altenmarkt/Alz, Germany.

Therefore **DONAU** Rapid Radial Drilling Machines will continue to exist. Specifically these are the **DONAU ALPHA**, the **DONAU FLEX 135** and **145**, the **DONAU MERIC 440** as well as the **DONAU PORT 540**.

The **DONAU** Machining Centres (DANUSYS) are discontinued as the existing programme of machining centers from ALZMETALL covers this segment already sufficiently.

Machine tools from **DONAU** are a result of innovative technical development. Meanwhile more than 14.000 drilling machines are in operation in a variety of industries around the globe.

**DONAU** develops and designs modern CNC-controlled, but also manually-operated rapid radial drilling machines.

In case you are interested to learn more about the wide range of **DONAU** Rapid radial drilling machine, we are inviting you to visit their webpages under [www.donau-wzm.de](http://www.donau-wzm.de)

In case you are interested to learn more about the wide range of ALZMETALL machining centers, we are inviting you to visit our webpages under [www.alzmetall.com](http://www.alzmetall.com).
